

ENVIRONMENTAL MANAGEMENT SYSTEM POLICY STATEMENT (ISO 14001:2015)

Net Global System and Technical Services Limited is committed to conducting its business in compliance with the required Environmental laws, regulations and permits in compliance to ISO 14001, 2015. **Net Global System and Technical Services Limited** works to continuously improve environmental performance and prevent pollution in all operations; Natural resources are conserved to the maximum extent by providing products from recycling, committed to the protection of environment and fulfilling its compliance obligations. Our policy is intended to help develop long-term benefits for all employees, our communities and the various stakeholders of our company.

This can be Achieve by:

- Employees and contractors shall comply with all applicable environmental rules and regulations.
- Clear lines of communication for all environmental programs and audits are established and maintained.
- All operations are managed in an environmentally-sensitive manner by emphasizing conservation through source reduction, recycling, and the use of renewable resources.
- Employees are trained to respond to environmental situations by taking appropriate action to meet regulatory requirements, prevent pollution and report immediately any release of hazardous materials to a supervisor or to the Site Environmental Coordinator.
- To help assure compliance with federal, state and local environmental laws and regulations, a Site Environmental Coordinator regularly monitors and audits environmental performance at each facility.

Net Global System and Technical Services Limited is committed to enforce and ensure compliance with the Environmental management system, regulatory requirement and continually improve in all area of its Environmental management system. Our management will be accountable for ensuring that strategic planning, budgeting, and implementation of the Environmental management system and policies are diligently executed while our employees comply with the continuous improvement of Environmental process.
